

III. SPECIFICATIONS

Changes to the Specifications are as follows:

1. [0002] line 4 has: fishing tackle having a strong leader with a notable new...
Change to: fishing tackle by having a strong leader with a notable new...
2. [0018] to [0021] has the following:

SUMMARY OF THE INVENTION

[0018] In view of the foregoing disadvantages inherent in the known types of fishing tackle now present in the prior art, the present embodiment of the invention provides an improved bottom fish rig, and overcomes the above-mentioned disadvantages and drawbacks of the prior art. As such, the general purpose of the present embodiment of the invention, which will be described subsequently in greater detail, is to provide a new and improved bottom fish rig and method which has all the advantages of the prior art mentioned heretofore and many novel features that result in a bottom fish rig which is not anticipated, rendered obvious, suggested, or even implied by the prior art, either alone or in any combination thereof.

[0019] To attain this, the present embodiment of the invention essentially comprises an elongated leader having a hook end and a line end. The hook end having a leader hook loop and the leader line end having a leader line loop. A first movement stop is frictionally connected to the leader. A second movement stop is frictionally connected to the leader. The second movement stop is located between the first movement stop and the leader hook end. A sliding c-weight is connected to the leader. The c-weight has a first end having a first bore with an external slot on one side and a second end having a second bore with an external slot on the other side.

[0020] There has thus been outlined, rather broadly, the more important features of the embodiment of the invention in order that the detailed description thereof that follows may be better understood and in order that the present contribution to the art may be better appreciated.

[0021] The present embodiment of the invention may also include a horizontal unilateral three-pronged hook, a snap and a swivel. There are, of course, additional features of the present embodiment of the invention that will be described hereinafter and which will form the subject matter of the claims attached.

3. The first sentence of [0021] is deleted and paragraph [0019] is deleted from [0018] to [0021] in the following and additional changes are added:

SUMMARY OF THE INVENTION

[0018] In view of the foregoing disadvantages inherent in the known types of fishing tackle now present in the prior art, the present embodiment of the invention provides an improved bottom fish rig, and overcomes the above-mentioned disadvantages and drawbacks of the prior art. As such, the general purpose of the present embodiment of the invention, which will be described subsequently in greater detail, is to provide a new and improved bottom fish rig and method which has all the advantages of the prior art mentioned heretofore and many novel features that result in a bottom fish rig which is not anticipated, rendered obvious, suggested, or even implied by the prior art, either alone or in any combination thereof.

[0019] The prior art of record neither discloses nor fairly teaches the recited limitations of the claimed combination including, but not limited to: an elongated leader, a first stop, a second stop, a c-weight, a swivel, a snap and a horizontal unilateral 3-prong hook.

[0020] There has thus been outlined, rather broadly, the more important features of the embodiment of the invention in order that the detailed description thereof that follows may be better understood and in order that the present contribution to the art may be better appreciated. There are, of course, additional features of the present embodiment of the invention that will be described hereinafter and which will form the subject matter of the claims attached.

4. Between paragraphs [0023] and [0024] add the section title:
OBJECTS AND ADVANTAGES

“[0023] As such, those skilled in the art will appreciate that the conception, upon which this disclosure is based, may readily be utilized as a basis for the designing of other structures, methods and systems for carrying out the several purposes of the present invention. It is important, therefore, that the claims be regarded as including such equivalent constructions insofar as they do not depart from the spirit and scope of the present embodiment of the invention.

OBJECTS AND ADVANTAGES

[0024] It is therefore an object of the present embodiment of the invention to provide a new and improved bottom fish rig that has all of the advantages of the prior art fishing tackle and none of the disadvantages.”

5. Change “three welded barbs” to three solidly-joined barbs in paragraph [0053] line 4 and [0064] line 10.
